Professional Summary

Full-Stack Developer with 3+ years of experience building production web applications with React, TypeScript, and Next.js. Improved dashboard performance, built reusable components, and implemented localization across eight languages. Built full-stack projects using MongoDB, Express.js, React, and Node.js (MERN), with REST APIs, authentication, and AI integration.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass, Java
Frontend: React.js, Next.js, Redux Toolkit, React Hooks, Context API, TanStack Query, React Hook Form
Backend & APIs: Node.js, Express.js, REST APIs, JWT, bcrypt, Zod, Axios
Databases: MongoDB, PostgreSQL, MySQL
Testing & Tools: Jest, Lighthouse, Git, GitHub, Jira, VS Code, Figma

Professional Experience

Software Developer Apr 2023 – Jul 2026
Cognizant (Client: EY)

- Improved React dashboard performance by 20%, measured with Lighthouse, through memoization and lazy loading.
- Led a five-member team to implement localization across eight languages for applications and microservices.
- Built an internal localization tool that reduced manual translation time by 70%.
- Translated Figma designs into production React and TypeScript components, contributing to 15% improvements in session duration and click-through rate.
- Led the winning team in Cognizant Ideathon, developing an AI risk forecasting tool that expanded risk coverage by 40% and improved defect detection lead time.

Projects

NoteStack.AI | GitHub Jan – Mar 2026
React, TypeScript, Node.js, MongoDB, Google Gemini API, Zod

- Built an AI-powered notes platform that converts notes into editable action plans and Kanban tasks using Google Gemini.
- Developed a context-aware pipeline to rank related notes, validate AI responses with Zod, and cache generated plans using content hashes.
- Implemented drag-and-drop task management with AI-assisted focus selection, deterministic fallback behavior, and server-enforced workflow constraints.
- Secured REST APIs with JWT authentication, bcrypt password hashing, and user-isolated MongoDB data.

DropDox | GitHub Jun – Aug 2024
Next.js, TypeScript, PostgreSQL, Clerk, ImageKit

- Built a full-stack file storage application using Next.js, TypeScript, and PostgreSQL.
- Implemented Clerk authentication with OTP verification to secure user access.
- Developed a responsive file management interface with drag-and-drop uploads through ImageKit, plus starred-file and trash features.

Education

Shivaji University Kolhapur, Maharashtra
Bachelor of Technology (B.Tech) *Mar 2018 – Aug 2022*
